Mines and Prospects--Furnaces and Mills

The Mill to Start at Chloride Point

Plant to Be Remodeled and Made to Reduce the Second-Class Ores of the Property.

That the mill with which the properties of the Chloride Point company on Lion hill, Tooele county, was equipped some years ago is to be remodeled and the second-class ores made to respond to the needs of Betsy and the bables is now quite positively assured, said George St. Clair, one of the lessees, last night. Tests made by hint and George Clark, his associ-ate in the lease, have demonstrated conclusively that these ores can be profitably leached, and with the ap-proval of the company, which was pledged them when they undertook to reclaim the mines, such methods as are adapted to the requirements of the ore will be installed. Since taking hold of the Chloride Point, Messrs, St. Clair assured, said George St. Clair, one of will be installed. Since taking hold of the Chloride Point, Messrs. St. Clair and Clark have marketed ores of the value of about \$20,000, with another carload now at the sampler, while it is hoped that they will get one more in at least before the snows begin to pile

Meanwhile these gentlemen, with others in the locality, are arranging for the development of a new group of claims underlying the old Zella, which was operated by the Messra. Walker and Marcus Daly at an early day, and from which a large amount of wealth was derlyed. It is the intention to drive a tunnel into the new group that shall tap the ledge at considerable depth, and to this end work will be inaugurated in a short time.

depth, and to this end work will be inaugurated in a short time.

At the Northern Light some prospecting is being done by the company,
while the Messrs. St. Clair are operating a lease with the outlook quite assuring, notwithstanding the dismemberment of the old mill and the forwarding of its machinery to various
parts of the State. The visitors have
never believed other than that Lion
and will be made ultimately very prohill will be made ultimately very pro-ductive, the ores with which they have this time come showing 125 ounces silver, with \$2 gold per ton.

STRIKE IN HANNAPAH

Salt Lake Company Unearths Rich Ore in the Mine.

A brief report from Frank B. Work superintendent of the Hannapah company's estate, eighteen miles east of Tonopah, which reached the general of-Tonopah, which reached the general offices in this city during the day, tells of the presence of ore there that varies from \$12.60 to \$69.09 per ton, while results from a picked sample forwarded to Manager A. F. Bettles show 263 ounces silver, with \$5.60 gold. The ledge from which these results were obtained was encountered in the level extending north and at a depth of 250 feet from the surface. When the report was closed thirty inches of ore was exposed, with everything to indicate that the main ore body was ahead of him. Conditions at the property, which was taken hold of by Mr. Work and his Salt Lake alliances about eighteen months ago, are identical, it eighteen months ago, are identical, it is said, with conditions at Tonopah, and while the search has been a long one it now looks as if the promised and had been reached. Some of the ore, says, Superintendent Work in his report to the management, shows a valuation of over \$400 per ton. He believes now that in the Hannapah results as gratifying as those at pah await him, and to demonstrate it is rushing the work. At the local offices the next report from the strike is awaited with liveliest anxiety.

SOME PECULIAR SAMPLES

Two-Pound Chunk of Ore Containing Cubes of Pure Silver.

Special to The Tribune. CALIENTE, N. M., Oct. 6.-Charles Mead, owner of the Silver King group of eight mines forty-three miles northwest of Callente, brought in some pe-callar samples of ore from his Desert Queen mine, one of the group. A two-pound clumk of ore containing cubes of pure sliver which would average fully 50

pure sliver which would average fully foper cent metal was taken from a lime ledge 250 feet deep, which has been run in on a pocket formation 410 feet.

One of these pockets yielded three tons of ore, which netted the owner 4620, and from another claim, the Boer, a fifteen-pound piece of ore wound with strings of silver was sent to San Francisco for exhibit. In early days these two claims were steady producers and were abandoned when silver was demonstized and relocated in 1828. Mr. Mead has now more than fifty tons of 1020-ounce ore on the dumps and blocked out, and is making arrangements to have it extracted and shipped to Sali Lake.

Burtiss & Walsh, owners of the Low-

Burtiss & Walsh, owners of the Low-lands group of mines, tweive in number, have given an 18-months option on them to Shea, Corniek & Co. of San Fran-cisco for \$25,000, of which 10 per cent is payable January 1, 1905, the balance in three equal payments six months, tweive months and eighteen months from that date. The ore assays 200 ounces siver and 22 per cent copper and runs in grey copper, with some peacock, all in lime and spar formation between quartitie and granite walls. It is south of Goode Springs.

L. M. Randolph, while drifting on a 22-foot body of shale carrying \$15 in gold in his Utah Con. claim north of Morgan, near the border of Death Valley, run into a three-foot ledge of white quartz carrying coarse gold in bunches, and sold a chunk of white quartz in which was imbedded a plece of gold the size and shape of a hazel nut for \$35.

Barry, Fisher & Morton, owners of the Los Angeles group of gold-copper claims northwest of Los Vegas, have given Sprague, Northrup & Co. of Chicago an option on their group of sixteen claims for \$20,000 to run one year. They have taken out considerable ore going over \$100 a ton in both values and have sacked about ten tons going \$155 per ton. The Chicago men will pit a gang of eight men at work on the claims October 15.

More Bread-Money for October Needs

Uncle Sam to Post Its Dividend This Afternoon, With Tetro to Follow on Saturday.

That Uncle Sam's cabinet, at the meeting of its members this afternoon, will post the usual \$5000 dividend for distribution October 29, was forshadowed by an official yesterday afternoon. While the loss of the shafthouse and scorching of the machinery incurred damages amounting to about \$5000, said he, it did not interfere in the slightest with the earnings of the company, and not only has a dividend been piled up, but there will be a few dollars to tuck away with which to swell the surplus. The lessee has become not only an important factor in the development of the mine, but the earnings from that source constitute no small unit, and conditions at mine and mill at this time are about as gratifying as have they been at any period under the present administration.

To post its October dividend the di-rectors of the Tetro Mining company will, said President Pollock, meet on Saturday. The company can well afford the distribution, said he, and before it is passed around it is not unlikely that a new ore body on the east-west "break" will have been added to the company's resources. Already, indeed some ore is occurring in the breast of the workings and everything at this

time is indicative of good results.

The Annie Laurie of Kimberly has posted its regular dividend of 50 cents a share, or \$12,500, while there is an im-pression that Sacramento shareholders -with another lot of quickeliver about ready for the market-will be permitted o break bread again the last of the

COPPER SHARE EARNINGS.

Comparison Between the List and Other Metals Companies. Of all the "copper shares" listed on

the Boston stock exchange the number by which dividends are paid is limited to ten, says a Boston publication. To this number Utah contributes two-Utah Con. and United States. Daly West is not included, in that the red metal produced by it and of which but \$180,000 pounds was marketed last year \$1,60,000 pounds was marketed last year was a by-product. At \$41 per share Utah Con. is earning the investor at \$3 a year 7.3 per cent, while at \$2 per annum the United States, at \$21 is paying the holder 9.5 per cent. Amalgamated, at \$58,50 is paying 2.4 per cent; Calumet, at \$515, is paying 7.7, and Tamarack, at \$117, is yielding 1.2 per cent. Chings is raying 55 per cent. cent. Quincy is paying 5.5 per cent on shares at \$91, and Wolverine 8.8 per

In contrast with these Daly West at the present market value, is paying the investor 25 per cent, while Silver King is paying him about 17 per cent, and Mammoth 35 per cent. Horn Silver, on its present market value, is yielding 20 per cent, and Uncle Sam 60 per cent, and so it runs through the roster of dividend-payers on the local board. The Boston investor might find it profitable to inquire into bargains that appear in the local shop windows before putting

AT THE BLUE BELL

Big Development of Gold Ore in the Lower Workings.

Reports from the Eagle & Blue Bell of Tintic all denote a development on the 666-foot level running south which compares favorably with any that has characterized the season, the rock carrying from \$12 to \$30 gold per ton and while the from \$12 to \$20 gold per ion and while the management is not exploiting it, the sources from which the information comes are not to be impeached. For some time the management, according to the story, was ploughing its way to the south through thirty feet of this ore. Some time ago its was decided to punch a hole in the limestone that appeared to echo under the hammer, and shooting through this ore was again encountered, it was nothing more than a panel between the two bodies and since that time the crosscut has extended fifty-five feet the crosscut has extended fifty-five feet in ore, with the two bodies showing a total width of eighty-five feet. It is this development which has advanced the shares and the condition there at this time is all favorable to greater results.

At Gold Crater.

This new district, about twenty-six miles a little south of east of Goldfield, attracted a great deal of attention in the mining world this last week and several groups of claims have been soid, says the News of Geldfield.

Ridge & Curtis purchased a group of claims and in a twelve-foot hole, taking an average from top to bottom and across, obtained an assay of \$174.

The Inman & Sanders strike runs from \$29 to \$70.

The Elliott, Williams & Colbura prop-

\$25 to \$700.

The Elliott, Williams & Colburn property shows a fine lead that runs from \$70 to \$100.

There is another strike about seven miles east of Gold Crater that runs as high as any found in Gold Craters.

R. W. Griswold and associates have purchased a group of claims.

The formation is the same as the Goldfield district and is bounded on the west by a lava cropping the same as at Goldfield. Porphyry mountains dot the plains and in these are found the quartz ledges. Some of the ore resembles the Goldfield ore and some looks like the typical Callfornia quartz.

CATTLEMEN, ATTENTION.

The annual meeting of the Utah Cattle Growers will be held Friday, Cattle Growers will be held Friday, October 7, 10 o'clock a.m. at the council chamber, city and county building. Officers for the ensuing year will be elected. Other business of importance will be brought before the meeting.

JOHN H. WHITE, President.

Herschel Company to Drive Tunnel

Gold-Bearing Ore Bodies to Have Independent Outlet and Subsequently a Mill.

That the wealth of gold-bearing ore opened up in Herschel ground through an avenue from Sacramento workings may be provided with an independent outlet, said Col. Joe Smith, who has returned from California, the management will begin driving a tunnel in a short time, connection with the ore bodies to be made at a point between 400 and 500 feet from its mouth. Of course the Mercur proposition, said he, will be ultimately equipped with a mill, but this will not be undertaken until the new tunnel is completed. A careful sampling of the ore body, said he, will reveal an average better than careful sampling of the ore body, said he, will reveal an average better than \$5 gold per ton, and as no stoping has ever been done in it it comes forward as a virgin proposition. Col. Smith has made several tests on the ore, and in the construction of the mill new methods improvised by him will probably be introduced. These, also, have been tried out by him with most satisfactory results. That a new tunnel is to be driven to the ore bodies in Herschel territory, with a mill to follow, will be cheerful news for the population of that gold camp. ulation of that gold camp.

Meanwhile the Consolidated Mercur is behaving more satisfactorily than at any period in many moons, the Sacramento mill and retorts are operating steadily, the Geyscr-Marion will have soon begun to respond, and with all this activity the rally next season should be a pronounced one.

SURVEY FOR TRAMWAY.

Line for the Continental Mines War Completed Yesterday.

The survey for the Continental company's five-mile aerial tramway was completed vesterday, the raising of the towers to begin next week, said Henry towers to begin next week, said Henry M. Crowther, the company's general manager, on his return from camp yesterday. The estimates of cost that have been completed by him indicate that the cost of this equipment will approximate \$75,000, but with the heavy tonnage that will devolve upon the management in meeting the requirements of the mill the tramway will have soon "paid for itself." Meanwhile the usual tonnage of second-class ore is being sent down by wagen, although the management, anticipating though the management anticipating the needs of the contractor, is now de-voting most of its energy to blocking out its resources and confining its shipout its resources and confining its sup-ments to what is necessarily broken, down in the procedution of that work. With the construction of the mill ex-cellent progress is being made, and by the first of the ensuing week it will be under cover, with nothing to pre-vent the setting up of the machinery as it shall be delivered by the manu-

facturers.
Activity around the old Emma, said Mr. Crowther, has created the impression that the lower workings are to be cleaned out, but of this he had ascertained nothing definite.

The arrival of supplies at camp fore-tells a winter of much activity up there, and spring should witness many important changes.

MORE RICH ORE.

Another Sensational Shipment From Mines of Goldfield.

There has just passed through the sampling works in this city another rich shipment of Goldfield ore. This shipment consisted of about 1800 sacks aggregating 100 tons of general run ore from the Bowes-Kernick lease on the Jumbo property, and brought not returns, after deducting freight, sampler charges, etc. of \$35,000, or at the rate of \$350 per ton net, or something over \$400 per ton gross. The continued rich shipments from this lease indicate that before November I, when the lease expires the total gross receipts will exceed \$1,000.60 a phenomenal record for any mine, says the Reno Gazette.

The Bowes-Kernick lease, while the smallest on the Jumbo, has nevertheless proven the richest, both in point of production and in the richness of the ore mined. While high values were obtained from the surface down, the richest strikes have been on the 200-foot level, to which depth the main shaft has been sunk and the drifts extended. ment of Goldfield ore. This shipment con

Boston Undertone Good.

Special to The Tribune.

Special to The Tribune.

BOSTON, Mass., Oct. 6.—There appeared to be some profit-taking in the local market during the early session and prices eased off somewhat, but the offerings were well taken. The general undertone was good, however, and sentiment still remains builfish. One of the features of the day was the buying of Parrot during the latter part of the afternoon session, which advanced the stock a full point. Traders bid up prices around the room during the last hour, and some new buying orders began to come in through commission houses, which helped to strengthen some of the copper shares. The closing was irregular. Hornblower & Weeks, brokers, 32 State street, Boston, and 10 Wall street, New York, furnish the following quotations:

Mining Notes.

Clark Knight, general superintendent of the Galena King mines at Stockton came in from camp yesterday on his way to his old home at Madison, Wis., and bearing with him the most cheerful news of con-ditions at the property, from which thir-ty tons of ore are now coming daily. Patrick Sheehan, formerly of the John ny's forces at Stateline, has returned from Goldneld, Nev., where he accurred inter-ests in two leases that promise to enrich his crowd.

The Callente Progress is the rame of The Callente Progress is the rame of a new paper just launched at that point on the San Pedro, with Will Louis Dunne as publisher and editor. The pages of the initial number show a keen appreciation of the mining industry and Mr. Dunne will, no doubt, be accorded the support to which his talents are entitled.

Seven carloads of ore from Tonopah were among yesterday's receipts at the valley smelters. Superintendent Jackson McChrysial of the Gemini mines at Tintic was among yesterday's visitors from the locality.

W. D. Bogan was among the day's ar-

rivals from Park City, where he is engaged in mining

President Samuel McIntyre of the Mam-moth has returned from its Tintic mines and mill, much pleased with the behavior of each.

James Duggan, the experienced foreman of the Honerine of Stockton, is a visitor, and, with the management, is quite en-thusiastic over conditions at the property. The management of the Lower Mammoth sold a carload of ore yesterday on controls showing 23 ounces silver, 35 per cent copper and 60 cents gold.

cent copper and 60 cents gold.

For a single carload of one from the Fortuna of Bingham the company yesterday received 1885.

The property formerly exploited by the Copper Mountain Mining company in Beaver county is to be made the assets of a \$1,000,000 reorganization, with those who responded to the last assessment in the old company to participate.

Manager Orang of the Habit Anex is to

Manager Orem of the Utah-Apex is to quip that Bingham proposition with a ompresor capable of supplying six pow-r drills. er drills

A \$20,000 gold shipment from Bambergor's De La Mar (Nev.) mines is now in its way to the sub-treasury in New York.

Manager Clive of the Oasis, Drum district, has another lot of gold and copperore at the sampler, and reports the condition at the mine a very satisfactory one. It is not unlikely that sloking will be resumed there in a short time.

A resert from the Lucky Boy mines at

A report from the Lucky Boy mines at Custer, Ida. indicates that the mill has about finished on the ores at the surface. W. W. Armstrong left for Park City

The Con. Virginia Mining company has levied an assessment of 25c per share, delinquent October 31. This is the first assessment levied on a Comstock mine since August 39. It is quite unusual to have such an interval in these levies.

again yesterday morning to inquire into various interests.

Asthma Can Be Cured

The statement of Mr. J. F. Homan, 20 E. Adams St., Chicago, proves that the worst cases of Asthma in the world are not only relieved, but are readily cured by Dr. Schiffmann's Asthma Cure. He says: "Asthma kept me in terrible misery for ten years until I used your Asthma Cure. After the first trial I was a changed man. I went to sleep that night and awoke next day much relieved and I have gotten entirely over the Asthma. It is now nine years since I was
